Section 4: Payment Processing & Settlement **[Module 4]**

4.1 Cash vs UPI vs Card Payments

Section 5: Shift Close & Cash Reconciliation **[Module 5]**

5.1 Closing Register Shift

HOW TO USE THIS GUIDE

Follow the numbered steps sequentially. Actions requiring manager or supervisor authorization are marked with a Warning icon. Use the glossary at the end for unfamiliar restaurant and tax terms.

Before processing transactions, you must record your starting cash float in the cash drawer.

1. Navigate to the POS screen (/pos). If prompted, enter your 4-digit POS PIN.

2. Count the physical currency notes and coins in the drawer.

3. Enter the starting float amount (e.g., ¹2,000.00) in the 'Open Register Shift' dialog.

4. Click 'Open Register'. The POS interface is now active and tracked against your shift.

1.2 Understanding the Screen Layout

The POS screen is optimized for touch efficiency with five primary areas:

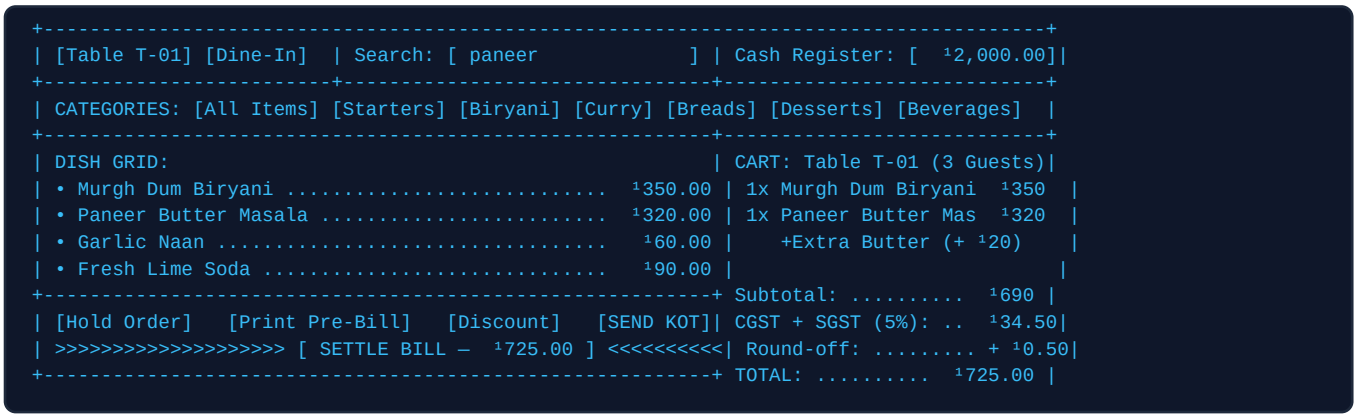
• Top Toolbar: Active branch, order channel tabs (Dine-In, Takeaway, Delivery), active register float balance.

• Category Carousel: Tap to filter dishes (Starters, Main Course, Biryani, Breads, Beverages).

• Food Item Grid: Large touch cards showing dish name, dietary dot, price, and Add button.

• Cart Summary: Current line items, portion sizes, modifiers, chef notes, taxes, and grand total.

• Action Buttons: [Send KOT], [Hold Order], [Discount], [Print Pre-Bill], and [SETTLE BILL].



• Dine-In: Tap the table badge (e.g., T-01). Green indicates available; Amber indicates occupied.

• Takeaway / Parcel: Tap 'Takeaway'. Table selection is bypassed; optional customer phone number box appears.

• Changing Quantities: Tap '+' or '-' in the cart, or tap the item to open the quantity keypad.

• Chef Cooking Notes: Tap the item name, click 'Cooking Notes', and enter special instructions (e.g., 'Jain prep, no onion no garlic', 'Extra spicy'). Notes appear highlighted in yellow on the Kitchen Display.

2.2 Sending KOT to the Kitchen

When order taking is complete, click the blue 'Send to Kitchen (KOT)' button.

• An electronic KOT ticket is generated and routed to the kitchen display.

• The table turns Amber (Occupied). Cart resets so you can take orders for the next table.

• If items are added later for the same table, a supplementary KOT is generated automatically.

RestaurantOS calculates statutory Indian GST transparently:

• Subtotal: Total gross amount of food and modifiers.

• Discount: Deducted from taxable subtotal prior to tax calculation.

• CGST (2.5%) & SGST (2.5%): 5.0% split GST calculated on net taxable value.

• Statutory Round-Off: Mathematical rounding to the nearest rupee (+ ¹0.10 to + ¹0.50 or - ¹0.10 to - ¹0.50).

• Grand Total: Exact integer rupee amount payable.

MANAGER DISCOUNT AUTHORIZATION

Promotional coupon codes apply automatically. Manual percentage discounts require a Shift Supervisor or Manager PIN before taking effect.

Click the green 'SETTLE BILL' button to open the settlement drawer:

1. Cash Payment: Enter physical cash tendered (e.g., ¹1,000.00). The screen displays change to return in green (¹275.00). Click Confirm. Cash drawer pops open automatically.

2. UPI QR Payment (Strict Verification): The terminal displays dynamic UPI QR code. Customer scans with GPay/PhonePe/ Paytm. CAUTION: Always verify counter soundbox or ask for the 12-digit Bank UTR (e.g., 431298012345). Enter UTR and click Verify & Settle.

3. Split Payments: Click 'Split Tender'. Enter ¹300.00 Cash; remaining ¹425.00 switches to UPI. Settle both portions cleanly.

STRICT UPI VERIFICATION RULE
NEVER press confirm just because a customer flashes a green phone screen. Always verify soundbox announcement or check the 12-digit Bank UTR to prevent fraudulent payment screenshots.

At the end of your shift, click 'Close Register Shift':

1. Count all physical cash notes and coins in the drawer.
2. Enter counted amount into 'Actual Cash Counted'.
3. The system compares physical cash against Expected Cash (Starting Float + Cash Sales - Refunds).
4. Review the Variance (Green = Match/Surplus, Red = Shortage).
5. Enter shift handover notes and click 'Close Register & Print Summary'.

Float
The initial cash placed in the register at the start of a shift for making change.

Split Tender
Settling a single bill across two or more payment methods (e.g., Cash + UPI).

Pre-Bill
A bill estimate printed for presentation to the dining table before payment is made.

Variance
The difference between physical cash counted in the drawer and recorded system cash sales.

- [ ] 1. Enter 4-digit PIN and open cash register with starting float.
- [ ] 2. Verify 80mm thermal receipt printer paper level.
- [ ] 3. Confirm Table number before punching items.
- [ ] 4. Verify dietary classifications (Veg/Non-Veg) with guest.
- [ ] 5. Dispatch KOT tickets promptly to avoid kitchen prep delays.
- [ ] 6. Verify all UPI payments using Soundbox or 12-digit Bank UTR.
- [ ] 7. Print tax invoice upon settlement and return exact cash change.
- [ ] 8. Perform physical cash count and print closing shift summary at end of day.
