Quick orientation of key instructions

Section 1: Kitchen Display Orientation [Module 1]

1.1 Accessing the KDS Screen
1.2 Reading a Kitchen Ticket Card

Section 2: Order Lifecycle & Rush Timers [Module 2]

2.1 The 4 Order Lifecycle Stages
2.2 Rush Stopwatch Color Codes

Section 3: Station Routing & Order Changes [Module 3]

3.1 Filtering by Station
3.2 Handling Voids & Cancellations

HOW TO USE THIS GUIDE

Follow the numbered steps sequentially. Actions requiring manager or supervisor authorization are marked with a Warning icon. Use the glossary at the end for unfamiliar restaurant and tax terms.

1. Turn on the kitchen wall monitor or touch tablet.

2. Open the browser and go to: http://localhost:3000/kitchen.

3. Enter your kitchen staff PIN.

4. Press F11 on the keyboard or tap full screen to enter dedicated Kitchen Display mode.

5. Ensure speaker volume is set to at least 70% to hear incoming order bell chimes.

1.2 Reading a Kitchen Ticket Card

Incoming orders appear as digital cards organized chronologically (oldest ticket first):

• Header: Ticket number (#KOT-0142), Table number (T-01), Order Channel (Dine-In/Takeaway), Server name.

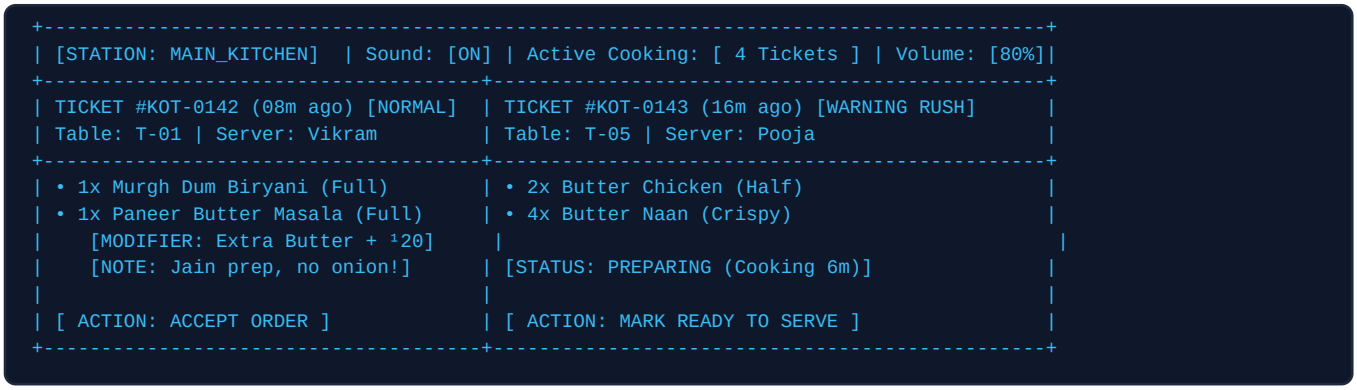
• Stopwatch Timer: Live elapsed timer showing minutes since the order was punched.

• Item List: Bold double-height item quantities (e.g. 2x, 4x) to prevent cooking count errors.

• Variant Portions: Clearly indicates Full or Half portion sizes.

• Blue Modifier Tags: Add-ons (e.g. +Extra Butter, +Extra Cheese).

• Red/Yellow Chef Notes: High-priority instructions (e.g. '& Jain prep, no onion no garlic').



Every ticket progresses through four standardized stages:

1. NEW: Unacknowledged order. Ticket pulses gently. Audio chime rings.

2. ACCEPTED: Cook has seen ticket and started staging ingredients. Click 'Accept Order'.

3. PREPARING: Pan/burner active. Click 'Start Cooking'. Cooking stopwatch begins.

4. READY: Plating complete. Dish placed on counter. Click 'Mark Ready'. Server is notified instantly.

2.2 Rush Stopwatch Color Codes

The top header of each ticket changes color based on elapsed time:

• Ø=ßâ Green (0 – 10 minutes): Normal pace. Prepare sequentially.

• Ø=ßá Amber (10 – 20 minutes): Warning rush. Expedite cooking immediately.

• Ø=Ý4 Flashing Red (> 20 minutes): Critical rush delay! Head chef must prioritize this ticket.

Large kitchens route tickets to specialized station screens:

• MAIN_KITCHEN: Curries, gravies, tandoor, rice, and hot entrees.

• BAR: Mocktails, cocktails, soft drinks, and beer.

• BAKERY: Cakes, breads, pastries, and plated desserts.

• BEVERAGE: Fresh lime sodas, juices, coffee, and tea.

Tap the station pill at the top of the screen to isolate only your station's items.

3.2 Handling Voids & Cancellations

If a supervisor cancels an item or bill, an audible double chime rings.

The cancelled item appears with a heavy strikethrough: ~~1x Murgh Biryani~~ [VOIDED].

Do NOT prepare voided items!

KDS
Kitchen Display System — replaces paper kitchen order slips with digital touch monitors.

Staging
Gathering and portioning ingredients before placing pans on active heat.

Supplementary KOT
An add-on ticket punched for a table that already has active food cooking.

- [ ] 1. Turn on KDS tablet and verify network connection.
- [ ] 2. Verify speaker volume is set to 70%+ for chime alerts.
- [ ] 3. Filter screen to your assigned kitchen station (or All Stations for Head Chef).
- [ ] 4. Acknowledge new orders by tapping 'Accept Order'.
- [ ] 5. Double-check cooking notes and allergy warnings before plating.
- [ ] 6. Tap 'Mark Ready' as soon as food is placed on the pickup counter.
- [ ] 7. Wipe tablet screen with clean dry microfiber cloth at shift end.
